

# NEW SOUTH WALES.

## MONTHLY SUMMARY OF BUSINESS STATISTICS.

No. 23. MARCH 24, 1933.

Issued by T. Waites, Government Statistician.

### INDEX OF WHOLESALE PRICES (SYDNEY).

Average for year 1911 = 100.

All prices are in Australian currency. The indexes for recent months are shown in table 24 on page 11 of this summary. The footnotes to that table apply also to this graph.

Useful rains fell over the greater part of the State in January, and brought relief in many districts where dry conditions were proving embarrassing, but February was a very dry month.

### 2. WOOL.

The total arrivals of wool in the first eight months of the current season are 2 per cent. greater than in the corresponding period of 1931-32, and it is anticipated that the total production (1932-33) will be slightly greater than in 1931-32. Satisfactory clearances are being made at auctions.

### 3. WHEAT.

The area sown with wheat for 1932-33 was 4,702,500 acres, including 4,388,700 acres for grain. The quantity of new season's wheat despatched or awaiting despatch from country stations of New South Wales Government Railways was 64,800,000 bushels as at 11th March, 1933. This quantity may include a certain amount handled twice. It is estimated that the total crop harvested in the State is in the vicinity of 8,000,000 bushels to 10,000,000 bushels greater than the net receipts at country stations of New South Wales Government Railways.

On 11th March, 1933, the quantity of new season's wheat grain stored in silos and on railway premises was 29,050,000 bushels. Of this quantity, 6,320,000 bushels were on sites in the Metropolitan Area. Stocks of grain and flour as at the end of November, 1932, appear to have been lower than at any time in the past five years.

The course of wheat prices is shown in Table 24.

### 4. BUTTER.

The bountiful rains of September and excellent following rains resulted in the largest spring production and export on record, but drier summer conditions caused a small relative diminution in supplies.

\* Adjusted by elimination of abnormal transactions on account of Governments.

† Unadjusted on account of amalgamation.

‡ Adjusted on account of amalgamation—Subject to revision.

§ State Government banking transactions suspended. Index not ascertainable.

Inter-bank clearings are regarded as an approximate measure of changes in the general volume of business transactions provided they are considered in conjunction with changes in price levels.

The index represents the ratio of each month's clearings to the average for the month concerned during the five years 1926–1930. This average is represented by 1,000 each month. Seasonal fluctuations have thus been eliminated. Casual fluctuations in monthly index numbers have been smoothed out by taking a three months' moving average, that is, the index shown above for each month is the average of the actual index of that month and the preceding two months. It may be compared vertically or horizontally.

No adjustment has been made for normal growth or change of price levels.

1933	...	...	1,013,436	792,235	2,257,683	1,518,033

The decrease is partly due to a lower level of values. Comparative figures for individual months are shown in Table 46 of the Statistical Bulletin of New South Wales for December quarter, 1932.

1931	...	29·2	30·7	31·6	31·5
1932	...	31·8	33·2	33·0	31·9

The above figures are compiled by the Commonwealth Statistician from returns supplied by Trade Unions, and represent the proportion of unemployed members to total membership in unions reporting.

## AGGREGATE AMOUNT OF WAGES PAID AND INDEX OF EMPLOYMENT.

Data under these headings are now being compiled. Progress tabulations, including nearly 100 of the larger factories, indicate that there were 38,166 employees on the pay sheets in the middle week of January, 1933, compared with 34,440 in the corresponding week of 1932. The increase occurred mainly in the iron, steel, engineering, and clothing trades. The volume of employment in retail trades is indicated in Table 10. According to returns collected by the Department of Labour, the numbers employed directly by Government Departments (including Local Government) on relief works in the last week of January, 1933, were 19,763. In addition, considerable numbers were employed by private employers from advances made by the Unemployment Relief Council.

## 22. STOCK EXCHANGE INDEX (SYDNEY).

The following index of the values of the principal Company shares on Sydney Stock Exchange embraces the ordinary shares of companies (excluding banking companies) whose business is conducted wholly or largely in New South Wales.

The prices of individual shares are unweighted, and the group averages are the means of the average monthly prices per £ of paid-up capital. The aggregate index is the average for the whole of the shares included in the groups with the addition of 24 miscellaneous shares. It represents the ratio of the average prices of ordinary shares to their par values.

Par Value of Shares = 100.

This summary is issued as soon as practicable after the 20th of each month. The subscription for twelve months is 3s. (posted), payable to the Government Printer, Phillip-street, Sydney, or 3d. per single copy at the Government Printing Office. This charge applies in all cases, except exchanges and Government Departments.

As space will not permit of repetition of matter, copies should be filed for reference.

Acknowledgment is made of the ready help given by numerous private organisations and businesses, and by various Government Departments in providing data for tables contained in this summary.

The figures for the most recent months are, in general, subject to revision.
